# INDEX

S.No.	Program	Date	Remaks
1.	Print "Hello" message using java.	19/04/22	
2.	Print Series 1 2 3 4 5 6 7 8 9 10	19/04/22	
3.	Print Series 1 1 2 1 2 3 1 2 3 4	26/04/22	
4.	Print Series 1 1 2 3 1 2 3 4 5	26/04/22	
5.	Make a calculator for addition, subtraction, multiplication, division and modular operator in JSP.	10/05/22	
6.	In JSP take input from user and find out whether it is odd or even.	17/05/22	
7.	Calculate electricity bill when number of units consumed is given.	31/05/22	
8.	Take a number from user, find out whether it is Armstrong number or not.	07/06/22	
9.	Take a number from user and find out whether it is palindrome or not.	14/06/22	
10.	In JSP, make your resume including html tags also.	14/06/22	

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

**Program 1:** Print "Hello" message using java.

**Code:**

```
class Class {  
    public static void main(String[] args) {  
        System.out.println("Hello");  
    }  
}
```

**Output:**

**Output**

```
java -cp /tmp/D14innS7Rh Class  
Hello
```

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

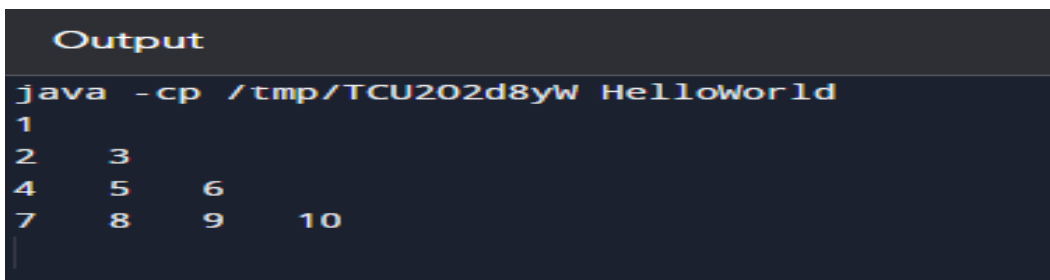

**Program 2:** Print Series

1  
2 3  
4 5 6  
7 8 9 10

**Code:**

```
class HelloWorld {  
    public static void main(String[] args) {  
        int rows = 4;  
        int count =1;  
        for (int i = 1; i <= rows; i++) {  
            for (int j = 1; j <= i; j++) {  
                System.out.print(count+"\t");  
                count++; }  
            System.out.println(); }  
        }  
    }  
}
```

**Output:**

```
Output  
java -cp /tmp/TCU202d8yw HelloWorld  
1  
2    3  
4    5    6  
7    8    9    10
```

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

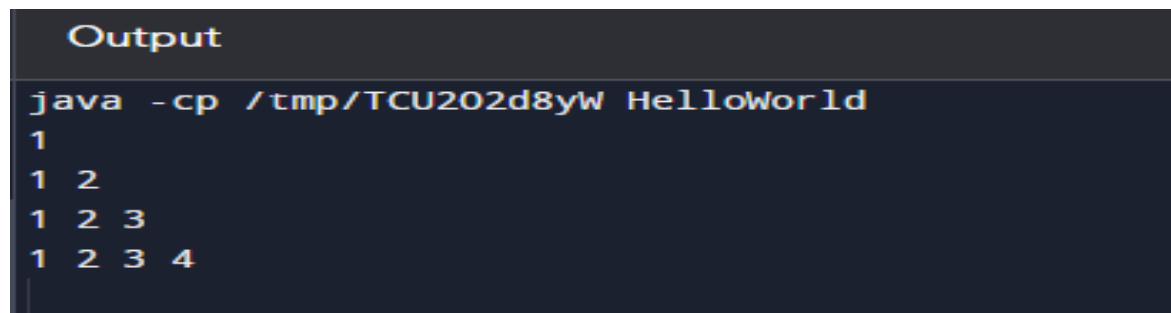

**Program 3:** Print Series

1  
1 2  
1 2 3  
1 2 3 4

**Code:**

```
class HelloWorld {  
    public static void main(String[] args) {  
        int rows = 4;  
        for (int i = 1; i <= rows; i++) {  
            for (int j = 1; j <= i; j++){  
                System.out.print(j+" ");  
            }  
            System.out.println();  
        }  
    }  
}
```

**Output:**

```
Output  
java -cp /tmp/TCU202d8yw HelloWorld  
1  
1 2  
1 2 3  
1 2 3 4
```

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

**Program 4:** Print Series

1

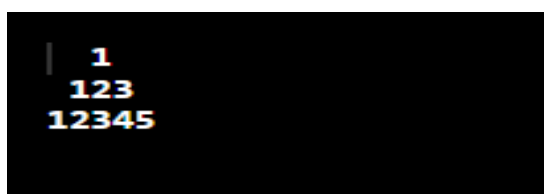

1 2 3

1 2 3 4 5

**Code:**

```
public class HelloWorld {  
    public static void main(String[] args) {  
        for (int i=1; i<=3; i++){  
            for (int k=1;k<=2-i+1;k++){  
                System.out.print(" ");  
            }  
            int num = 1;  
            for (int j=1; j<=2*i-1; j++){  
                System.out.print(num);  
                num++;  
            }  
            System.out.println(); } }  
}
```

**Output:**

```
| 1  
 1 2 3  
1 2 3 4 5
```

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

**Program 5:** Make a calculator for addition, subtraction, multiplication, division and modular operator in JSP.

**Code:**

```
<html>

<body>

<script>

const operator = prompt('Enter operator to perform the calculation ( either +,-,
* ,% or / ): ');

const number1 = parseFloat(prompt ('Enter the first number: '));

const number2 = parseFloat(prompt ('Enter the second number: '));

let result;

if (operator == '+') {
    result = number1 + number2;
}

else if (operator == '-') {
    result = number1 - number2;
}

else if (operator == '*') {
    result = number1 * number2;
}

else if (operator == '%'){
    result = number1%number2;
```

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

```
}  
else {  
    result = number1 / number2;  
}  
document.write(" Result is " + result);  
</script>  
<body>  
</html>
```

**Output:**

Enter operator to perform the calculation ( either +, -, \*, % or / ):

OK Cancel

Enter the first number:

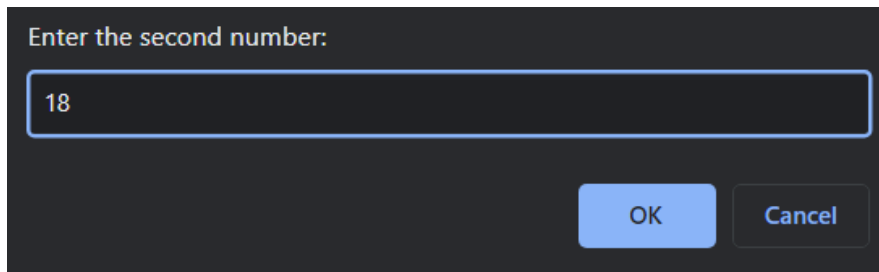

OK Cancel

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

**Program 6:** In JSP take input from user and find out whether it is odd or even.

**Code:**

```
<html>

<body>

<script>

function oddEven(number){
if(number%2==0){
return("The number is Even");
}
else{
```

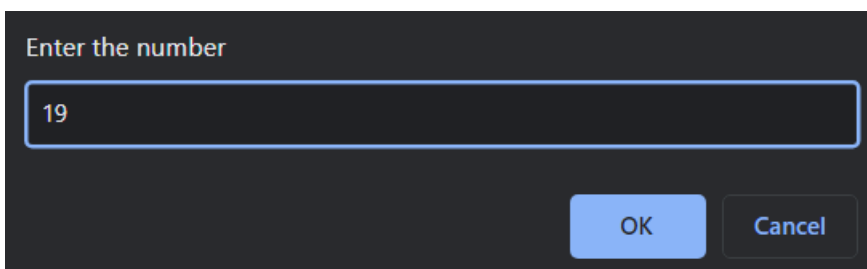

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

```
return("The number is Odd");  
}  
}  
</script>  
<script>  
var n = parseInt(prompt("Enter the number"));  
var ans = oddEven(n);  
document.write(ans);  
</script>  
</body>  
</html>
```

**Output:**

A screenshot of a JavaScript prompt dialog box. The title bar says "Enter the number". The input field contains the number "19". There are two buttons at the bottom: "OK" and "Cancel".

Enter the number

19

OK Cancel

A screenshot of the output of the JavaScript code. It shows the text "The number is Odd" in a white font on a solid teal background.

**OUTPUT**

The number is Odd

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

**Program 7:** Calculate electricity bill when number of units consumed is given.

**Code:**

```
<html>
```

```
<body>
```

```
<script>
```

```
function calculateBill(units)
```

```
{
```

```
    if (units <= 100)
```

```
    {
```

```
        return units * 10;
```

```
    }
```

```
    else if (units <= 200)
```

```
    {
```

```
        return (100 * 10)+ (units - 100)* 15;
```

```
    }
```

```
    else if (units <= 300)
```

```
    {
```

```
        return (100 * 10)+ (100 * 15)+ (units - 200)* 20;
```

```
    }
```

```
    else if (units > 300)
```

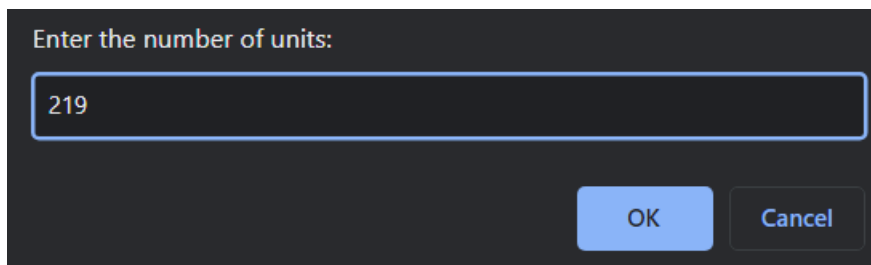

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

```
{  
    return (100 * 10)+ (100 * 15)+ (100 * 20)+ (units - 300)* 25;  
}  
return 0;  
}  
</script>  
<script>  
var units = parseInt(prompt("Enter the number of units: "));  
document.write("Total Electricity Bill: ");  
document.write(calculateBill(units));  
</script>  
<body>  
</html>
```

**Output:**

A screenshot of a JavaScript prompt dialog box. The title bar is dark gray. The main area has a dark background with the text "Enter the number of units:" in a light gray font. Below the text is a text input field with a light blue border, containing the number "219". At the bottom right, there are two buttons: "OK" and "Cancel", both with a light blue gradient and dark text.

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

**Program 8:** Take a number from user, find out whether it is Armstrong number or not.

**Code:**

```
<html>

<body>

<script>

    function Armstrong(number)
    {

        var original,remainder,res = 0;

        original = number;

        while(number > 0)

        {

            remainder = number%10;
```

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

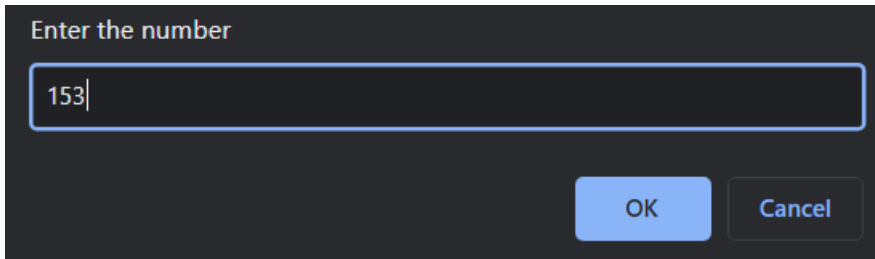

```
        res = res + remainder*remainder*remainder;
        number = parseInt(number/10);
    }
    if(res == original)
    {
        return("The number is Armstrong");
    }
    else
    {
        return("The number is not Armstrong");
    }
}
</script>
<script>
var n = parseInt(prompt("Enter the number"));
var ans = Armstrong(n);
document.write(ans);
</script>
</body>
</html>
```

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

**Output:**

**Program 9:** Take a number from user and find out whether it is palindrome or not.

**Code:**

```
<html>

<body>

<script>

function validatePalin(str) {

    const len = string.length;
```

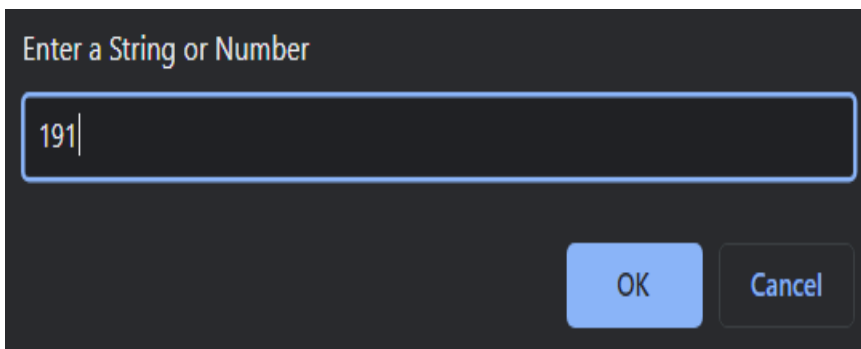

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

```
for (let i = 0; i < len / 2; i++) {  
    if (string[i] !== string[len - 1 - i]) {  
        return( str+' is not a palindrome');  
    }  
}  
  
return( str+' is a palindrome');  
}  
</script>  
  
<script>  
  
const string = prompt('Enter a String or Number ');  
const ans = validatePalin(string);  
document.write(ans);  
</script>  
</body>  
</html>
```

**Output:**

Enter a String or Number

191

OK Cancel

**Name:** Bazgha Razi

**Registration Number:** 191380214

---

**Program 10:** In JSP, make your resume including html tags also.

**Code:**

```
