Paper Code:BSC-MATH-203G   **Subject: Mathematics-III**

Time: One Hour Thirty Minutes   **Max. Marks: 30**

Note: Attempt any *three* questions including Q.no. 1 which is compulsory. All questions carry equal marks.

Q.1.Attempt any two questions: (5 X 2 =10)

a. Let f: $R^2 \rightarrow R$ be defined by f(x,y) = $\begin{cases} \frac{xy^2}{x^2+y^4}, & (x,y) \neq (0,0) \\ 0, & (x,y) = (0,0) \end{cases}$

Prove that $\lim_{(x,y) \to (0,0)} f(x,y)$ does not exist.

b. Find first order partial derivatives of u=log $(x^2 + y^2)$

c. Evaluate $\int_0^3 \int_0^1 x^2 + 3y^2 dy dx$

d. Define Homogenous functions.

e. Evaluate $\int_0^a \int_0^a \int_0^a xyz \, dxdy \, dz$

Q.2. (a) If u= $\frac{x^2y^2}{x+y}$ find the value of $x\frac{\partial^2 u}{\partial x^2} + y\frac{\partial^2 u}{\partial x \partial y} = 2\frac{\partial u}{\partial x}$ (10)

OR

(b) Find the points on the surface $z^2 = xy + 1$, nearest to the origin.   (10)

Q.3. (a) Evaluate by changing the order of integration of $\int_0^{4a} \int_{\frac{x^2}{4a}}^{2\sqrt{ax}} dy dx$ (10)

OR

(b) Determine the area between the parabolas $y^2 = 4ax \; and \; x^2 = 4ay$ (10)
